Approval Status

Approved

Select exception type:

Procurement

Reason for procurement exception:

Standardization

Reason for contract exception:

**Reason for P-Card exception
(temporary change)**

Enter a brief description of your exception request:

WRS is requesting Standardization for Shinmaywa Pumps. Any new application where Horsepower is 10 and below, we been installing the Shinmaywa pumps. Just as a brief history regarding the Shinmaywa pumps, back on 2019 Power and Pumps reach out to us to offer a free pump for demo purposes. Around that time, we were having issues with Lift Station 036 located 1965 SW 30TH CT with ragging issues sometime 2 -3 times per week. On December 19th, 2019, we decided to move forward with installation placing pump on slot #1. June of 2020, we follow up with Power and Pumps to give them a performance update with nothing to report because the pump never failed. In August 2020, we move forward purchasing the first pump for slot #2. We have then standardized on applications of 10 HP and below with the Shinmaywa pumps with an avg. of 20 pumps install as of today. In March of this year Shinmaywa factory rep. came to assist with training. He requested to go on site of the first installation to check for performance tolerances. Up to this day we have not gone back to station due to pump failures. A sole source has already been performed. SSP-210 with a current contract of 240041

Approval Activity History

Actor	Actions	Date
 <p>Daphne Robinson drobinson@ocalafl.org</p>	<p>Approve</p> <p>The standardization of Shinmaywa Pumps, exclusively distributed by Power & Pumps, Inc., is approved. Based on the foregoing, standardization is justified because the Shinmaywa pumps provide operational advantages over Groundfus pumps in the current system. Groundfus has also stopped making pumps to service 10 horsepower or less systems. The product has been field tested by WRS staff without incident and has proven to be compatible with existing infrastructure. Thank you for providing this informative request.</p>	Monday, October 16, 2023
