Impact Development Partners, LLC / PD23-45098

Petitioner: Impact Development Partners, LLC
Agent: Fred N. Roberts, Jr, Esq, Klein & Klein, LLC
Planner: Endira Madraveren 352-629-8440
emadraveren@ocalafl.gov

A request to rezone from PUD-0, Planned Unit Development, to PD, Planned Development, and approval of PD Plan with Design Standards, property located at the northwest corner of SE 24th Road and SE 31st Street (Parcel 29851-000-00), approximately 14.15 acres.

Recommended Action: Approval

City Council Tentative Schedule: Upon recommendation of approval or denial by the P & Z Commission, this item will be presented to City Council for introduction at the **Tuesday, October 3, 2023**, City Council meeting and second and final hearing at the **Tuesday, October 17, 2023**.

CITY OF OCALA**Meeting Date: September 11, 2023****PLANNING AND ZONING COMMISSION REPORT**

Subject: PD Rezoning & Plan with Design Standards

Submitted By: Endira Madraveren, AICP

Department: Growth Management

Ordinance Reading Date: October 3, 2023 (1st City Council reading)
October 17, 2023 (2nd & final City Council meeting)

Resolution Reading Date: October 17, 2023

STAFF RECOMMENDATION (Motion Ready): Approval of a rezoning from PUD-0, Planned Unit Development, to PD, Planned Development, and approval of PD Plan with Design Standards for approximately 14.15 acres of property located at the northwest corner of SE 24th Road and SE 31st Street (Parcel 29851-000-00) (Case PD23-45098).

OCALA'S RELEVANT STRATEGIC GOALS: Economic Hub, Quality of Place

BACKGROUND:

- **Applicant:** Impact Development Partners, LLC
- **Property Owner:** 31st Street, LLC
- **Agent:** Fred N. Roberts Jr, Esq, Klein & Klein, LLC
- The subject property was approved as PUD, the original PUD has been expired for over 25 years. Due to municipal record keeping, the previously approved development standards are no longer available.
- The property is surrounded on three sides by assisted living facilities and multi-family complexes.
- The traffic study is currently under review, staff has recommended revisions.
- The PD plan includes enhanced design features, including Florida-Friendly plantings in the buffers and open space, pedestrian walking trails, and enhanced landscaped entrances.
- Taller, 4-story buildings are proposed to be located towards the interior of the development, with the 3-story buildings on the exterior.

FINDINGS/CONCLUSIONS: The PD plan is consistent with the land development regulations, and it is compatible with the surrounding area.

FISCAL IMPACT: N/A

ALTERNATIVES:

Applicant: Impact Development Partners, LLC
Agent: Fred N. Roberts Jr, Esq, Klein & Klein, LLC
Property Owners: 31st Street, LLC
Project Planner: Endira Madraveren
Zoning from: PUD-0, Expired Planned Unit Development
to: PD, Planned Development
Parcel Information
Acres: ±14.15 acres
Parcel(s)#: 29851-000-00
Location: northwest corner of SE 24th Road and SE 31st Street
Existing use: Undeveloped

Adjacent Land

<u>Direction</u>	<u>Future Land Use</u>	<u>Zoning District</u>	<u>Current Use</u>
North	Low Intensity	PUD-14	Brookdale Assisted Living Facility
East	Low Intensity	PUD-07 PUD-14	Casa Park Villas Subdivision Brookdale Assisted Living Facility
South	Neighborhood	R-1, Single-Family Residential	South Point Subdivision
West	Low Intensity	PUD-10	Marion Woods Assisted Living Facility

Background:

The subject property was annexed into the City in 1973. It was approved as a Planned Unit Development; staff was able to locate documentation that the PUD was expired prior to the South Point subdivision development in 1998. Due to municipal record keeping, the previously approved development standards are no longer available.

The PD plan and Standards Book, which have gone through three rounds of review at staff level, propose a 260-dwelling unit apartment complex with a density of 18.0 units per acre for the 14.15-acre site. The maximum density in the Low Intensity future land use is 18 dwelling units per acre. The maximum height of the development will be 55-feet with the taller, 4-story buildings located interior to the parcel. A 15-foot enhanced landscape buffer is proposed along SE 31st Street. The remaining buffers around the perimeter of the property vary between 10 and 15-feet. A secondary access is proposed at the NE corner of the subject property.

The PD Standards book provides for enhanced features including Florida-Friendly plant species within the buffers and open space, pedestrian walking trails, and landscaped entrances.

Planned Development Required Standards (Section 122-942)

- (a) In reaching recommendations and decisions as to rezoning land to a PD district and approving a conceptual site development plan, the planning and zoning commission and city council

shall apply the following standards, in addition to the requirements of this chapter applicable to the rezoning of land generally:

1. *Access.* Every permitted use in a PD shall have access to a public street directly or via an approved private road, pedestrian way, court or other area dedicated to public or private use, or common element guaranteeing access.

Staff Response: The proposed development has access onto SE 31st Street and SE 24th Road.

2. *Buffers.* When a PD abuts a less intensive use, it will be required to adhere to section 122-260, pertaining to buffer specifications, at a minimum. City council may require additional buffering based on individual circumstances.

Staff Response: The PD does not abut a less intensive use. The development will provide enhanced landscaped buffers along SE 31st Street, SE 24th Road, and the western boundary abutting Marion Woods Assisted Living Facility.

3. *Underground utilities.* Within a PD, all utilities, including telephone, television cable and electrical systems, shall be installed underground in accordance with current city policies and standards. Appurtenances to these systems which require above ground installation must be effectively screened, and thereby may be excluded from this requirement.

Staff Response: Utilities are proposed to be located underground such that tree installations are possible without conflict.

4. *Open space.* Open space requirements for a PD are as follows:
 - a. Open space shall include active and passive recreation areas such as courtyards, streetscapes/sidewalks, playgrounds, golf courses, waterways, landscaped yards and patios, lagoons, floodplains, nature trails, roof areas, and other similar open spaces. Water retention areas that are designed as aesthetic lakes or ponds for passive or active recreational use may also be counted as open space, as long as these areas are designed to retain a minimum of three feet of water at all times.

Staff Response: There is a proposed minimum 40% open space. These areas will include enhanced landscaping with walking trails.

- b. Fenced water retention areas, open water areas beyond the perimeter of the site, street right-of-way, driveways, off-street parking areas and off-street loading areas shall not be counted in determining open space. Side yards less than six feet wide shall not be counted as open space.

Staff Response: Aggregate open space will be provided per Section 122-924(4). Gross open space is calculated at 5.87-acres, with proposed aggregate open space calculated at 0.63-acres.

- c. Open space shall be clustered into larger tracts/areas. Buildings and structures should be clustered so that the open space is usable to the occupants/residents

rather than merely providing spacing between buildings or structures. Zero lot line and clustered design is encouraged. Front, side and rear yards in single-family residential areas shall not be counted as aggregate open space.

Staff Response: Open space is clustered into usable recreation areas for residents.

- d. There shall be a minimum open space requirement of 25 percent of the total gross acreage for all development in any PD project. For single-use residential PD projects, the minimum open space requirement shall be 40 percent. At least ten percent of the total required open space shall be in usable aggregate form. Aggregate open space is defined as common open space areas that are designed and intended for use by all occupants/residents of a PD.

Staff Response: There is a proposed minimum 40% open space. These areas will include enhanced landscaping with walking trails.

5. *Unified control.* The applicant shall furnish the city with sufficient evidence to the satisfaction of the city attorney that the applicant is in the complete, unified and otherwise-unencumbered control of the entire area of the proposed planned development, whether the applicant be an individual, partnership, corporation, other entity, group or agency. The applicant shall provide the city all necessary documents and information that may be required by the city attorney to assure the city that the development project may be lawfully completed according to the plans sought to be approved.

Staff Response: The application includes a Letter of Authorization signed by the current property owners – 31st Street, LLC.

6. *Phasing.* City council may allow or require phasing of the proposed development. All phasing must be related to previous development, surrounding properties, and available public facilities and services, where a failure to proceed with subsequent phases of development will have no adverse impact on the completed phase(s) or surrounding properties.

Staff Response: Phasing will be determined during the site plan process.

7. *Platting.* All uses/parcels meeting the definition of a subdivision shall meet chapter 114 (subdivisions) requirements.

Staff Response: A subdivision process is not required for this development.

8. *Site plan review.* Development requiring site plan review shall comply with Chapter 122, Article IV. A final site plan shall be consistent with a final development plan.

Staff Response: Subsequent to PD approval by City Council, the site plan may be submitted for staff review by the applicant.

9. *Development.* A development meeting the criteria for a shopping center shall comply with all regulations as set forth in division 29 of chapter 122 (shopping centers) except for: subsections 122-908(7),(8) and (9) and 122-918(a)(1).

Staff Response: N/A.

10. *Access to utility systems and public services.* A PD shall be located in relation to sanitary sewer lines, water lines, storm/surface drainage systems, and other utility systems.

Staff Response: Utility services are outlined in detail in the Level of Service Impact Analysis below. All utility services are located in proximity to the development.

Staff Recommendation: Approval of PD23-45098
--

Basis for Approval:

The PD plan is consistent with the land use category and land development regulations. Staff recommends approval.

Factual Support:

1. Consistent with the following Objective and Policies of the City of Ocala Future Land Use Element:
 - a. Objective 12: The Future Land Use Element shall require efficient use of existing services, facilities and infrastructure to discourage urban sprawl and promote a clustered urban development pattern.
 - b. Policy 12.1: The City shall require that all development have adequate services and facilities including water, roads, sewage collection and treatment, stormwater drainage, recreation and solid waste disposal, to the extent required by state law, other provisions of this Comprehensive Plan, or the City's Land Development Code.
2. The requested zoning designation of PD, Planned Development, is eligible to implement the land use designation of Low Intensity and the PD plan is consistent with chapter 122, article V, division 30 of the City's land development regulations.
3. Approval of this request will not adversely affect the health, safety, convenience, prosperity or general welfare of the community.

Level of Service Impact Analysis:

Transportation: Developments proposing to generate 100 or more peak hour trips are required to submit a traffic study as part of the site plan review. The Traffic Study is currently under review. Although the study has not been completed, it appears that the developer will be responsible for extending the eastbound left-turn lane on SE 31st Street at SE 17th Court/project driveway. They will also be required to submit several supplemental items such as: a 3-year crash history review for the intersections of SE 31st Street at 17th Court and SE 24th Road as well as recommendations to mitigate failures for built-out conditions at the unsignalized intersection of SE 31st Street and SE 24th Road.

Potable Water: Water service is available. An existing 8-inch water distribution main runs along SE 31st Street, while a 12" water distribution main runs along SE 24th Road.

Sanitary Sewer: Sewer service is available. Existing 8-inch gravity mains run along both SE 31st Street and SE 24th Road.

Stormwater: This property is not located within a flood zone. Facilities must be designed to provide flood protection for a 100 year 24-hour storm event. For any future development, runoff must be retained on-site to match pre-development conditions.

Solid Waste: Service is available. Dumpster locations will be determined during site plan approval.

Fire Service: City Fire Station #7 is located within a 0.5-mile radius.

Schools: The impacted schools are currently experiencing localized overcrowding for South Ocala Elementary, Osceola Middle, and Forest High.

Zoning Classification

Proposed:

A planned development (PD) zoning district is intended to provide a process for the evaluation of unique, individually planned developments, which may not be otherwise permitted in zoning districts established by this chapter. Standards and procedures of this district are intended to promote flexibility of design and permit planned diversification and integration of uses and structures, while at the same time retaining the absolute authority of city council to establish such conditions, stipulations, limitations and restrictions as it deems necessary to protect the public health, safety and general welfare.

HōM OCALA

PLANNED DEVELOPMENT

PD STANDARDS

Prepared for:

Impact Development Management, LLC.

Prepared by:

Kimley-Horn and Associates, Inc.

July 2023

1700 SE 17th Street, Suite 200
Ocala, Florida 34471
352 438 3000

PD PLAN

INTRODUCTION

“HōM Ocala” Planned Development is approximately 14.67 acres located within the City of Ocala (29851-000-00), west of the intersection of SE 31st Street and SE 24th Road. The property is located within an area of the City that includes a diverse mix of existing land uses that support the goals defined in the City's Comprehensive Plan.

The PD Plan for “HōM Ocala” provides a blueprint for the preferred development patterns, design qualities, and transportation systems that should be encouraged in this 260-unit apartment complex development.

Consistent with requirements for a PD Plan, these PD Standards (“Standards”) establish project objectives that are appropriate for planning. It is expected that during review for “Impact Development”, the following activities will take place:

1. PD Plans will be prepared and submitted through the City of Ocala development review process.
2. Updates to building architecture and articulation will be amended if needed to reflect design.
3. Adjustments to the Standards contained in this document will be submitted by the developer and approved by the City at a staff-level as permitted in Sec. 122-946 of the City's Code of Ordinances.

These Standards serve as the foundation for the planning and development efforts of the plan, following the provisions of the City's Planned Development (PD) district and Low Intensity Future Land Use classification. In compliance with the City's PD requirements, the PD Plan is comprised of components intended to provide assurance that the development of the property complies with the requirements of the City's Comprehensive Plan and Chapter 122 of the Code of Ordinances. The PD Plan and Standards are the culmination of a comprehensive and collaborative planning process designed to provide the framework for development within this area.

The Standards have been prepared to encourage and regulate the multi-family residential use of the development in accordance with this document, including building and site design elements, which help ensure the provision of sound and sustainable land use planning. These components are more fully described and presented throughout this document and include the PD Plan, delineation and identification of Planning Area and Standards for development. This application is consistent with the City of Ocala's Low Intensity Future Land Use classification and PD zoning district.

These Standards may be amended, as permitted in Sec. 122-946, by the Applicant and/or their designee, from time to time, to reflect changes in market conditions and development processes. The PD Plan includes standards that have been developed based on existing site features, available infrastructure, the City's overall vision for the area and similarly situated residential developments. The PD Plan provides a sustainable land use which is compatible internally and with adjacent properties. The standards provide flexibility to best respond to current and future market forces, changes in building and development patterns and community demographics. The project's proposed densities and intensities are consistent with the Low Intensity land use classification of the City's adopted Comprehensive Plan.

OVERALL GUIDING PRINCIPLES

This PD Plan is for a residential apartment complex with up to 260 units and open space. The following guiding principles are intended to provide a framework for development and provide for implementation of the overall vision.

- Buildings should be organized and arranged to reinforce the primary street edges, to provide for transit opportunities (when appropriate), and to complement the topography, vegetation, or other natural features of the site.
- The overall site design intent shall be to strengthen building-to-street relationships and to reinforce a balance between pedestrian and vehicular movements. The location of a building entrance is a key design element that can enhance or detract from a strong building/pedestrian connection. Emphasis shall be placed on logical and rational building entrances and the connection to the primary road frontage of the building.
- The location and design of surface parking is important in establishing the character of the project. Surface parking shall generally be designed as described in Section 122, Article V, Division 29 and Article VI of the Code of Ordinances.
- The project architecture shall promote and enhance a pedestrian scale and orientation on any façade facing a street, through building articulation, transparency, or other design treatments.
- Building form should articulate site access points and other points of interest to assist in pedestrian and vehicular wayfinding.
- Buildings should be articulated to highlight access to building entrances and public/common spaces. Design elements may include but not limited to, canopies, overhangs, recesses, projections, arcades, arches, or display windows.
- Vehicular service areas for multiple buildings are encouraged to be consolidated whenever possible.
- Access driveways have been designed and are shown to minimize congestion.
- Pedestrian and automobile traffic should be separated to the extent possible. Where such traffic conflicts occur, consideration should be given to special paving or similar techniques to clearly mark such crossings.
- Large parking areas should contain clearly defined pedestrian corridors to provide safe access to adjacent buildings.
- Crosswalks may use enhanced paving materials that are complementary to adjacent development.
- Public space may be coordinated with water management facilities to provide amenities, such as water feature overlooks, or paths.
- Driveway and parking lot areas should be illuminated for safe maneuvering of motor vehicles. Lighting assemblies along driveways shall be consistent in type and color, with those used in the common areas and should generally not exceed 35 feet in height; pedestrian level lighting should generally not exceed 16 feet in height. Light fixtures may allow for additional elements such as non-commercial banners or hanging planters. Lighting should include cut-off fixtures, where appropriate, and light shall not spill beyond parcel boundaries. Lighting adjacent to exterior boundary or neighboring residential shall be 16 feet in height and shielded to limit impacts on surrounding properties.

DEVELOPMENT STANDARDS

This PD is intended to provide for flexibility in design while meeting the City's intent for development in this region. These standards and supporting application materials allow for proper development with intent to minimize impacts to and from adjoining land uses. Site development must be ever mindful of the emphasis on pedestrian connectivity with safe and inviting design addressing convenient access for walking and bicycling for users of the area. Such emphasis shall be achieved at all development stages. The overall program distribution may be adjusted according to the needs of the community, providing the total densities and intensities included in the PD Plan are not exceeded. "HōM Ocala" PD Plan provides appropriate buffers, setbacks and development standards to mitigate impacts to existing adjoining uses.

Land uses shall be in accordance with the standards contained within this PD Plan.

This PD Standards book is intended to communicate the general design intent of the project. When the opportunity arises to present a superior design alternative that may not adhere to each and every standard in this book, The City of Ocala may permit such superior design alternative through an administrative review and approval of the referenced project.

Table 1: Development Standards for Residential Use	
Standard	Requirements
Tract size (acres)	±14.67 acres
Intensity (minimum and maximum FAR)	0.0 (min), 0.50 (max)
Maximum Density	18.0 Units / Ac.
Minimum Setbacks (feet) ¹	Front Yard: 20' Side Yard: 20' Rear Yard: 20'
Minimum Lot Size	N/A
Building Height	Maximum 55 feet
Building Service Areas	Buildings shall be organized to group the utilitarian functions away from the public view from public streets. Delivery and loading operations, HVAC equipment, dumpster locations, backflow preventers and other utility and service functions shall be incorporated into the overall design of the building and landscaping.
Dumpsters	Dumpsters shall be screened consistent with City standards; with construction materials that complement the primary building. Dumpsters shall be screened with masonry walls if visible from the public. Trash compactors shall not be located along the western property line to provide distance from neighboring residential areas.
Parking	Parking shall be pursuant to Article VI of the Land Development Code at 1.5 spaces per unit.

Table 1: Development Standards for Residential Use	
Standard	Requirements
Utilities	Utilities should be located/buried such that tree installations are possible.
Lighting	Lighting assemblies along driveways shall be consistent in type and color and should generally not exceed 35 feet in height; pedestrian level lighting should generally not exceed 16 feet in height. Light fixtures may allow for additional elements such as banners or hanging planters. Lighting adjacent to exterior boundary shall be shielded to limit impacts on surrounding properties.
Signage	Signage shall be provided for the proposed uses and for pedestrian safety based on applicable portions of the Code of Ordinances, Chapter 110, Article III, Division 2. This shall include Sec.110-158 (1)(c). Back lighting or external illumination shall be allowed. Monument signs and wayfinding signage shall be identified on the site development plans and will be permitted separately as required in the Code of Ordinances.
Buffers ¹	Buffers shall comply with 122-260, except where shown otherwise on the PD Plan. Buffers and landscaping are proposed to be provided based on the type and intensity of development.
Open Space	40% minimum. See notes and site data on plan.
Exterior Elevations	Exterior elevations are provided within this booklet.
Accent Materials	Accent features shall be provided to ensure an aesthetically pleasing development and may include elements reflected in the illustrative graphics included in the PD Plan including, but not limited to pavers, landscape islands with vertical plantings, accent building materials, and other architectural features.
Lots and Roadway Alignment	Lot acreage and delineation/boundary may be adjusted at the time of the formal site plan for minor engineering and planning considerations, subject to City approval.
Access	The proposed development shall be provided access to the public road as generally illustrated on the PD Plan.
¹ Buffers may include trails and other similar passive recreation uses including but not limited to landscaping, fencing, drainage/water retention areas, walls, signage and underground utilities.	

ENHANCED FEATURES OF THE PLANNED DEVELOPMENT

The following are enhanced features of the PD that exceed typical code requirements:

1. Buffer Along SE 31st St:

- a. Required: 10' Wide landscape buffer. 1 Small Tree per 25 LF and 3' ht. hedge planted 3' o.c.
- b. Proposed: 15' Wide enhanced landscape buffer with 1 Small Tree per 25 LF, 3' hedge planted 3' o.c., with ground cover and ornamental grass plantings utilizing native and Florida-Friendly plant species and a hierarchy of sizes to create interest and depth. Small Trees as possible around utilities.

2. Stormwater Retention Adjacent to Property Boundary:

- a. Required: Hedge to screen around drainage retention facility.
- b. Proposed: Enhanced 10' Buffer including 1 Shade Tree per 50 LF, 1 Small Tree per 25 LF utilizing native and Florida-Friendly plant species and a hierarchy of sizes to create interest and depth, and native shrub and ornamental grass plantings (3' ht. min. and 48" o.c. max.) Where existing trees are present, 1 Small Tree per 50 LF with native shrub and ornamental grass plantings.

3. Buffer Along West boundary:

- a. Required: 10' Wide landscape buffer. 1 Small Tree per 25 LF and 3' ht. hedge planted 3' o.c.
- b. Proposed: 20' Wide Natural enhanced landscape buffer preserving existing trees and understory vegetation. 1 Small Tree per 25 LF and 3' ht. hedge planted 3' o.c. located outside of and around trees and vegetation to supplement existing buffer where shown.

4. Buffer Along SE 24th Rd:

- a. Required: 5' Landscape screening of vehicular-use areas with hedge.
- b. Proposed: Enhanced 10' Buffer utilizing native and Florida-Friendly plant species and a hierarchy of sizes to create interest and depth. Includes Shade Trees, Small Trees, and native shrub and ornamental grass plantings, 3' ht. min. and 48" o.c. max. See notes on plan regarding trees proposed per LF.

5. Open Space Landscaping:

- a. Required: None.
- b. Proposed: Enhanced landscaping planted at Open Space edges to help define and enhance the area. Native and Florida-Friendly plant species are used as a hierarchy of sizes to create interest and depth to frame the open space.

6. Pedestrian Trails:

- a. Required: None.
- b. Proposed: Pedestrian walking trails throughout internal open spaces and around the perimeter of a proposed retention area. Walking trail around the proposed retention area will be supplemented with a gazebo or pavilion for use by residents.

7. Landscaped Entries:

- a. Required: None.
- b. Proposed: Enhanced landscaping planted within curbed medians at project entrances. Plantings can include Small Trees, native shrubs, and ornamental grass plantings.

WRITTEN SUMMARY OF NEIGHBORHOOD MEETING
November 17, 2022
Impact Development SE 31st Street Multi-Family Planned Development

A neighborhood meeting regarding the PD Rezoning on the above referenced property was held on November 17, 2022 in the Fellowship Center of the First Baptist Church located at 2801 SE Maricamp Road, Ocala, FL 34471. A copy of the notice which was mailed to all property owners on the circulation list provided by planning staff of the City of Ocala is included herewith. Notice of the meeting was also published in the Ocala Star Banner.

At the meeting, representatives from the applicants' engineers, Kimley-Horn, Inc., and the attorney for the applicant, Fred N. Roberts, Jr. of Klein & Klein, LLC, made a presentation on the project and related impacts with draft renderings and conceptual plans. Reduced size copies of those items are included herewith.

Upon completion of the presentation, a question-and-answer period was held. The majority of people in attendance appeared to be from Casa Park Villas. However, the owners of other properties located in the area were also in attendance. Questions were mostly revolved around (1) the proposed use, (2) concerns relating to site lighting and traffic headlights at the point of egress on SE 24th Street Road , and (3) the intersection of SE 24th Street Road and SE 31st Street.

The meeting was relatively short and the concerns seemed to be mostly assuaged by the proposed use and project plans. The most significant concern appeared to be with the possibility that the site would be used for commercial purposes. However, once it was established that it was a residential use, it was a very cordial conversation between those in attendance and the developer representatives mostly providing general information and answering questions.

Good Afternoon Aubrey & Patti,

We're holding a neighborhood meeting in advance of submitting a rezoning application to PD for Parcel 29851-000-00 (located at the northwest corner of the intersection of SE 31st Street and SE 24th Road). Attached is a copy of the property owner notification letter for any City staff that may want to be in attendance.

Let us know if you have any questions.

Thank you,

Jameson A. Frederick, P.E.

Subject: CASE PD23-45098
Date: Monday, August 28, 2023 7:55:31 AM

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

I am writing you concerning CASE PD23-45098. My address is 3110 SE 17th Terrace, which is directly across from the proposed development. My wife and I are opposed to the development. The increase in traffic and congestion will lead to traffic safety concerns. It appears that one of the entrances/exits will share or be located directly across from South Point neighborhood. We are concerned for the increase in traffic and hazards that come with that congestion.

Again we would like to record our opposition to the rezoning and proposed development.

Respectfully,

Joseph C Joyce
3110 SE 17th Terrace
Ocala, FL 34471
