DEFINITIONS

- Trash:** Trash is defined as anything loose and useless, including, but not limited to bottles, cans, paper, plastic bags, plastic bottles, plastic food wrappers and Styrofoam cups and plates.
- Debris:** Debris is defined as objects lying on the ground in an area to be mowed that are mostly organic, including, but not limited to: tree limbs less than six inches (6”) in diameter and smaller than six feet (6') in length, tree branches, twigs, hedge clippings and sapling trimmings.
 - One or two broken concrete blocks would qualify as debris, but an abundance of blocks would be the City's responsibility to remove.
 - If the Contractor finds large items such as old tires, concrete blocks, old chairs or sofas, dead car batteries, etc., on a site to be mowed, Contractor shall contact the City Project Manager to report the findings, and the City will remove and properly dispose of the debris. Otherwise, it is the Contractor's responsibility to remove and properly dispose of debris before mowing.

MOWING

- Mow at a height of three inches (3”) for Bahia grass, four inches (4”) for St. Augustine grass, and three inches (3”) for Zoysia grass.
- Mowing areas and Frequency:** Mow all grassed areas in accordance with the frequency indicated below. However, the City reserves the right to adjust these frequencies as needed. Specific mowing days and dates will be set by the City. Contractor must follow the City noise ordinance when planning mowing times.

*The City anticipates mowing frequencies as outlined above; however, the City reserves the right to adjust these frequencies as needed.

3. **Trash and Debris:** Contractor **must** pick up and remove trash and debris in and around the area to be mowed (to include fence lines) before mowing and properly dispose of it so it is not chopped up by the mower. Contractor is responsible for a clean area (free of trash and debris) with neat appearance, even cut and no clumps of grass to remain in the mowed areas. If the cuttings leave a thick blanket like cover over the existing cut area the operator must repeat the cycle to scatter the grass cuttings. An air blower shall be used to remove debris from the parking lot at Fire Administration building during each mow cycle.
4. **Damages:** Contractor shall be responsible for any and all damage caused while performing grounds maintenance/mowing services including, but not limited to, damage to any water sprinkler systems, shrubs, trees, fence, gates, valve boxes, etc.
 - A. All damages are to be reported to the City Project Manager where final disposition will be made as to replace and/or repair.
 - B. All replacement and/or repairs shall be performed by Contractor at no additional cost to the City.
 - C. Any damaged ground sprinklers **must be repaired immediately** to ensure compliance with water conservation regulations.
 - D. Leaning signs and bollards leaning due to contact with equipment shall be straightened.
5. **Backflows:** Backflow assemblies are located in various areas throughout the City. In the event a backflow assembly unit is damaged or destroyed by Contractor, Contractor shall be liable for all damages and shall be responsible for any costs associated with the repair or replacement of the unit(s). Contractor’s employees shall at all times have a wrench in their possession to shut off the water should damage occur. Report any damage to the City Project Manager.

TRIMMING AND WEED CONTROL

1. **Trimming:** Trimming shall be done in areas inaccessible by mowers (fence lines, trees, signs, etc.).

- A. Trimming may need to be performed due to slope of ground and around any trees, fences, utilities (fire hydrants, meter boxes, transformers, etc.) within the mowing areas.
 - B. Contractor shall trim tops, sides, and bottoms of all hedges to maintain a manicured appearance.
 - C. Contractor shall remove all organic debris from the site, including clippings, dead leaves, broken branches, and twigs. Contractor shall properly dispose of these items.
 - D. Trimming shall be done once every month.
2. **Chemical Use (if properly licensed):**
- A. Near Private Property: When using chemicals in place of weed eating to treat fence lines, special care shall be used to ensure that chemicals are NOT sprayed onto adjacent private property.
 - B. Around Park Amenities and Support Facilities: When using chemicals in place of weed, eating around park amenities and support facilities are NOT permitted.
 - C. Roundup and similar chemicals are only permitted to be used to spray fence lines and cracks in sidewalks and other paved surfaces or to kill or retard the growth directly under trees as specified herein and shall not be used for any other purpose unless written consent is provided by the City.
 - D. Care should be taken to not over spray onto adjacent turf. Over spraying resulting in damage of grass will require exact replacement of sod at Contractor's expense.
 - E. Fence Spraying: A three-inch (3") swath shall be sprayed on either side of the fence to maintain grass and weed control, providing the adjacent side of the fence is not private property.
 - i. If the adjacent side is private property, a three-inch (3") swath shall only be sprayed on the City property.
 - ii. Once the vegetation has been trimmed down to ground level with a weed - eater or similar device and the remaining vegetation removed from the fence, the area should be treated with chemicals. Trimming and chemical treating of said vegetation shall be done on the same day the mowing is completed.
 - F. Tree Spraying: A one foot (1') diameter area from the base of trees shall be maintained when trimming around trees.
 - i. Contractor shall chemically kill or retard the growth directly under trees using Roundup or other suitable and equally effective herbicide.
 - ii. When chemically trimming around trees, special care is to be given as not to spray the suckers growing from the ground around the tree; this may damage or kill the tree.
 - iii. Removal of the bark greater than 25% of the diameter of the tree will require the tree to be replaced at no additional cost to the City. This is common around Crepe Myrtles and not normally found around Oaks and other common hard wood trees.
3. **Crape Myrtles**: Prune crape myrtle bushes once a year in February. Contractor shall prune away last season's growth when the bush is dormant. Prune away long, dormant libs and remove seed pods. Remove sucker growth from trunk bottoms.
4. **Grass Debris**: When mowing or using an air blower, grass shall be directed away from roads, sidewalks, retention areas, fences, landscape beds, and fence lines.

5. **Sidewalks & Curb Edging:** Sidewalks shall be edged, and where there are cracks in the sidewalks or curbing with grass and weeds growing through the cracks, the vegetation shall be sprayed with an approved herbicide. After the vegetation is dead, it is to be removed with a weed-eater or similar string device.
6. **Weed Control:** Bed, weed control shall be maintained in shrubbery beds, mulched areas, and tree rings.
