Tyndale's Response:

All employees included in the clothing program are able to log in to Tyndale's secure web-based ordering platform with their username and self-created password to access their customer catalog of Ocala-approved items. Each of your workers receives an Ocala-funded annual allowance or allotment which is displayed on the website from which they can purchase their preferred combination of Ocala-approved AR/FR clothing and other PPE directly from Tyndale. Tyndale's automated allowance/allotment management system maintains a complete profile of each eligible employee.

7. The City will not be responsible for monitoring the spending account for each participating employee.

Tyndale's Response:

Tyndale's automated allowance/allotment management system maintains allowance amounts for each eligible employee, ensuring that all employee purchases are tracked and reported. Simply provide a list of eligible employees with their appropriate allowance amounts and our website, which is fully integrated with our allowance management system, ensures allowances/allotments are strictly adhered to. Employees can see their allowance amounts on the website, and it is updated in real time as purchases are made. Employees cannot spend beyond their set allowance amount without providing a personal payment method – ensuring all budgetary requirements are met. Management may opt to either "carry over" or "zero out" unused allowances at the end of a period.

8. The number of employees participating in the clothing program will vary from year to year. **Tyndale's Response:**

Tyndale understands and acknowledges that the number of eligible employees may change from year to year. Simply provide any removals or additions to your dedicated Tyndale Account Specialist and the program is updated – typically within 72 hours – or you can provide a new roster each year. Our vast inventory allows us to support Ocala's growing employee base, as we perpetually stock sufficient quantities of core products and maintain an average 90% fill rate – meaning items are on our shelves and available to ship when orders are placed.

9. Customer services turnaround time shall be 48 hours or less for response.

Tyndale's Response:

Our knowledgeable US-based Customer Service team supports employees regarding questions or issues and is proud to maintain a 90%+ first call resolution rate and an average hold time under two minutes. If questions or issues need to be escalated to the Account Specialist or Account Manager, those concerns are typically resolved in 48 hours or less.

CLOTHING SPECIFICATIONS

1. In lieu of providing clothing specifications, the City intends for each Vendor to provide the City with a **percentage discount off catalog (or listed) pricing.**

Tyndale's Response:

Tyndale's pricing structure does not align with offering a percentage discount off catalog or listed pricing. However, Tyndale is proud to offer price-competitive garments particularly within the context of a fully managed allowance program. Tyndale's pricing is inclusive of critical services like our advanced online ordering system, dedicated account management, individualized delivery, strict spend enforcement, customized reporting, monthly detailed billing, direct-to-user support, and more – all integrated into your program at no additional cost. Please see *Attachment 6: Tyndale Detailed Service Specification*, for more information on our value added services.

4. Clothing shall be free of defect in material and workmanship.

Tyndale's Response:

When purchasing from Tyndale, you can feel confident that items are free of defects. In the unlikely event of a product defect, our unique position as a manufacturer and distributor allows us to warrant all garments against manufacturing or fabric defects for the useful life of the garment. Tyndale guarantees all AR/FR clothing we sell to maintain its flame resistance throughout the useful life of the garment so long as home laundering instructions are followed, and bleach is not used during laundering. Home laundering instructions accompany each shipment, so your employees know how to care for their clothing properly. Whether manufactured by Tyndale or one of our suppliers, Tyndale repairs or replaces any garment at no charge that is determined at Tyndale's sole discretion to have a manufacturer's defect. In the rare event of a defect, Tyndale replaces the garment and deals directly with the garment manufacturer on your behalf.

QUANTITY

Tyndale's Response:

Tyndale acknowledges that there are approximately 70 employees requiring uniform purchases that fall under this contract. If selected, we look forward to providing them with high-quality flame resistant clothing and user-friendly online ordering experience.

2. The expectation is that each employee will purchase 8 – 12 full uniforms (shirt/pants) within the first two years of the start of the contract, then 4 full uniforms each year thereafter. This is an estimated annual usage only, and nothing herein shall bind the City to purchase any specified quantity of product(s).

Tyndale's Response:

Tyndale acknowledges Ocala's expectation that each employee will purchase 8-12 full uniforms (shirt/pants) within the first two years of the start of the contract then 4 uniforms each year thereafter. This is easily accomplished through our allotment program offering (quantity and style based) verses our allowance program offering (dollar based). Tyndale understands that this is an estimated annual usage only and that nothing herein shall bind Ocala to purchase any specified quantity of product(s).

3. It is also further understood that the City shall not be obligated to purchase or pay for any product(s) covered unless and until ordered and received in good condition by the City.

Tyndale's Response:

Tyndale typically provides statement billing, where a single monthly invoice for all shipments that occurred within that month is provided. Ocala may also opt for credit cards, invoices that accompany each shipment, evaluated receipt settlement, or electronic invoicing via email to make payment as easy as possible. It's important to note that if Ocala pays via credit card, cards are charged when the order ships. Also, allowance/allotment amounts are updated in real time.

If employees aren't happy with their purchase, we offer hassle-free returns and exchanges. Ocala employees can return an unwashed, unworn, unaltered, and unembellished item to Tyndale within 60 days for virtually any reason. Ocala does not pay for return shipping or any restocking fees.

4. The City may increase or decrease the number of uniforms (or employees) as it deems necessary.

Tyndale's Response:

Adjusting the allotment or allowance and adding or removing employees in Ocala's program is simple – the employee's supervisor or a program administrator completes a short action form and sends it to your dedicated Account Specialist. Once the action form is received, the change is made quickly, typically within 72 hours.

5. No minimum order quantity of products shall be required under this contract.

Tyndale's Response:

Tyndale understands that no minimum order quantity of products shall be required under the contract. Minimum order quantities only apply to select items and custom products. We are happy to work closely with Ocala to ensure these are not part of the program.

6. The utility logo shall be located on the shirts, sweatshirts and outerwear on the left breast pocket, or in the event there is no pocket on the garment, in the left breast pocket area.

Tyndale's Response:

Tyndale understands Ocala's request, however, embellishing a logo on a breast pocket closes the pocket and it is not be usable. Alternately, Tyndale is happy to logo *above* the left breast pocket on garments that have a breast pocket. On garments that do not have pockets, Tyndale applies the logo in the left breast pocket area.

7. Each individual department/division's online catalog must have the ability to specify logo application (Department/color).

Tyndale's Response:

Tyndale's website only displays logos that employees are eligible to use. Different catalogs for individual department/divisions can have specific logos available to them in their custom catalog. We can also make logos required if needed.

 - Tyndale's 800 number is displayed prominently on the website to encourage employees to deal directly with Tyndale and avoid lost work time.
- A web-chat feature – as well as a helpful video guide – are available on the login page to assist employees with accessing their Tyndale accounts.
- When employees need clothing quickly, they simply activate Tyndale's In-Stock filter to shop from program items that are on our shelves and available to ship quickly – typically within seven (7) days.
- All products include user-generated product ratings and reviews, a powerful tool enabling workers to choose products based on peer feedback.
- Employees know when to expect their products. Once color, size, and logo requirements are selected, an Estimated Ship Date (ESD) is quoted for each item before the order is finalized. For orders placed with Tyndale's customer service department, ESD is also quoted by phone before the order is finalized.
- Orders can be placed online or by phone.

If administrative users would prefer to place orders on behalf of multiple employees, they can do so quickly and easily through the Supervisor Portal. Administrators access information and check employee and account status. This, in turn, maximizes worker productivity

Deal of the Month

Saving you money and enabling your employees to purchase even more with their program funds, Tyndale offers the opportunity to feature specific sale items through Tyndale's managed portal for wearers.

- Featured Deal of the Month (DOTM) sales items are shared by Tyndale and pre-approved by Ocala management.
- DOTM functionality promotes sale items available to workers online.
- When employees log in to the managed site, DOTM items are highlighted on the homepage and on the side of the ordering site.
- DOTM helps employees maximize their purchasing power.
- DOTM items are updated monthly.

Automated Program Management System

Tyndale's automated allowance/allotment management system maintains a complete profile of each eligible employee, containing the employee's name, ID number, work location, job classification, sizing statistics, allowance balance, and history of allowance purchases.

- The profile allows for simple access to all account information, ensuring that all employee purchases are tracked and reported.
- Employees cannot spend beyond their set allowance amount without providing a personal payment method – ensuring all budgetary requirements are met.
- Management may opt to either “carry over” or “zero out” unused allowances at the end of a period.
- Adding or removing employees to the program is simple – the employee's supervisor or a program administrator completes a short action form and sends it to your company's dedicated Account Specialist.
 - Once the action form is received, the new hire is enrolled within 24-72 hours.

Individualized Delivery System

Employees receive individualized service and comprehensive support throughout the ordering and delivery process:

- Each order is processed and packaged individually and delivered to the employee's home or work location, based on your Ocala's preference.
- Within each order, employees receive a packing list that serves as a record and informs employees of their account status.
- Employee packing lists include the employee's name, ID number, work location, job classification, opening allowance, value of the order, ending allowance, and items ordered, shipped, and backordered. No arduous guesswork, common with other suppliers!
- To encourage employees to deal directly with Tyndale for questions, returns, exchanges, issues, etc., packing lists prominently feature Tyndale's 800 number and web address.
- All shipments include intuitive care instructions in a convenient format designed to be kept near the home washing machine.

Group deliveries to one location are accompanied by a master detail packing list that serves as a checklist and audit trail. For easy reference, the master detail packing list is organized by job classification and alphabetically by name.

Reporting

Minimize administrative oversight while keeping your finger on the pulse of the program through comprehensive reports provided on a regular basis by Tyndale.

- Our automated program management system records quantities, styles, descriptions, colors, sizes, lengths, prices, logos, order dates, ship dates, shipment numbers, sales order numbers, shipping addresses, billing addresses, PO numbers, payment terms, shipping terms, shipping charges, notes, and alterations.
- Details are recorded for all orders, shipments, employee payments, returns, and repairs, and organized by employee as part of the Employee Profile.
- Standard reports include Units and Volume Reports and Leftover Allowance Reports.
- Additional custom reports are available upon request – generally within 48 hours. Once created, custom reports can be provided on a regular schedule as your needs require. In the event a custom reporting request is particularly complex, Tyndale provides a quote for the development work and can typically recommend a lower- or no-cost alternative.
- Receive our full range of reports by email.

Invoicing

Say hello to transparent invoicing that makes sense. Ocala receives invoices that are straightforward – concise, accurate, simple, and flexible. Choose from several formats that show both summary and detail information.

- Statement Billing, where Tyndale submits a single monthly invoice for all shipments that occurred within that month, is the most popular billing option.
- Ocala may also opt for credit cards, invoices that accompany each shipment, evaluated receipt settlement, or electronic invoicing via email to make payment as easy as possible.
- Oversize charges, cut-to-order charges, and shipping charges can be either deducted from the employee's allowance at the time of order or billed directly to Ocala, outside of the employee allowance.

Forecasting

Sophisticated forecasting ensures your employees receive the products they need when they need them. For both Tyndale-made and distributed garments, our multi-departmental process is driven by technology. Tyndale's full-time inventory planning team utilizes software systems and partners with Sales and Manufacturing to produce a forecast utilized internally and externally to manage resources, optimize product availability, and streamline delivery – benefitting wearers and management alike!

- Forecasting allows us to offer you the shortest delivery intervals possible. We dedicate resources to ensure your selected products are in our warehouse in the right combination of color, size, and style, so they're ready to ship when your employees place their orders.
- Inventory forecasting is fully automated and managed by Tyndale's inventory planning team through John Galt Atlas Software.
- Tyndale's forecast is evaluated monthly, and adjusted frequently, to reflect changes as they occur.
- We know you rely on maximum product availability with minimal lead times. We provide forecasts on a rolling basis to our fabric manufacturers and key vendors to ensure a smooth-running program.

Tyndale Mobile App and Layering Tool

Tyndale is committed to providing the most user-friendly purchasing experience. Your employees can take advantage of our mobile app to order AR/FR clothing and access helpful resources – including our Layering Tool – directly from their device whenever and wherever it's most convenient for them.

- Access Tyndale's Mobile app from any web-enabled smartphone or tablet to browse products, place orders, check order status, browse blog articles, watch videos, and more.
- Layering AR/FR clothing is not as simple as adding the arc ratings of two or more garments together. Garments must be tested together to determine their system arc rating. Luckily, Tyndale's Layering Tool – accessible through the Tyndale Mobile App or managed website – eliminates guesswork from the safety equation.
 - The most robust, proprietary tool of its kind in the industry, Tyndale's Layering Tool places the data employees need to meet Ocala's compliance requirements at their fingertips.
 - Employees can reference this tool to find the combined protection level of two or more garments from your catalog.
 - The tool also tracks employees' program purchase history, enabling them to reach a desired level of protection by layering new items from their catalog with garments already in their closet.

Returns and Exchanges

Returns are quick, easy, and free:

- An employee can return an unwashed, unworn, unaltered, and unembellished item to Tyndale within 60 days for virtually any reason.
- Ocala does not pay for return shipping or any restocking fees.
- To return an item, the employee simply logs into the online ordering website and prints a return shipping label, or contacts Tyndale Customer Service to request a label, for eligible items. From there, the employee encloses the return in a shipping container, affixes the no-charge shipping label to the outside, and passes the shipment along to UPS.
- Employees may even return logoed items. If Ocala chooses to allow returns of embellished garments, Tyndale requests including consignment provisions for handling logoed inventory in the contract.
- Employees receive their replacement products or account credit promptly – typically within two business days from receipt at our distribution facilities.
- Employees may also request basic repairs, repair kits, and routine alterations of select items – free of charge.

Tyndale 360° Events: Choose Your Own Experience – In-Person or Virtual

When entering a new clothing program, or as your needs for AR/FR clothing evolve, employees understandably have questions about the program and the new garments they are required to wear. That is why we are pleased to include a Tyndale 360° event as part of the managed program implementation process. What is included in a Tyndale 360° event, and how does either a virtual or in-person event work? For in-person events:

- Tyndale works with you to determine the best time and place to hold your Tyndale 360° event.
- Tyndale Field Sales Representatives bring a sampling of garments specific to your program for employees to view style, fabric, and fit prior to ordering.
- During this time, representatives are available to answer any questions wearers might have related to your Ocala's program and/or garment selection.

The virtual format for Tyndale 360° events offers all the same benefits as the in-person experience while maintaining safety protocols.

- We schedule an online meeting with employees, and they join virtually.
- We provide the same educational information as we would during traditional in-person Tyndale 360° events.
- Our comprehensive tools make it easy to outfit workers effectively without any in-person contact.

The Tyndale 360° Experience was created to streamline our traditional “onsite fittings” and provide a complete service to assist employees with all aspects of the program, garments, and care/maintenance. Correct fit and comfort is paramount when choosing the correct AR/FR clothing, which can save lives in the event of an arc flash.

Product Warranty

When purchasing from Tyndale, you can feel confident that items are free of defects. In the unlikely event of a product defect, our unique position as a manufacturer and distributor allows us to warrant all garments against manufacturing or fabric defects for the useful life of the garment.

- Tyndale guarantees all AR/FR we sell to maintain its flame resistance throughout the useful life of the garment so long as home laundering instructions are followed, and bleach is not used during laundering. Home laundering instructions accompany each shipment, so your employees know how to care for their clothing properly.
- Whether manufactured by Tyndale or one of our suppliers, Tyndale repairs or replaces any garment at no charge that is determined at Tyndale’s sole discretion to have a manufacturer’s defect. In the rare event of a defect, Tyndale replaces the garment and deals directly with the garment manufacturer on your behalf.

In-House Logo and Embellishment Services

Present a professional image and maintain strong branding in the field with quality logo customizations. Using state-of-the-art equipment and materials, our highly trained staff of embellishments professionals provide embroidery, heat transfer, and reflective striping services.

- FR thread is available in 15 colors. Non-FR rayon thread is available in a wide range of 100+ colors with some Pantone matching capabilities. We match your design as closely as possible with color options available.

Data Security

Rest assured, the information you entrust to Tyndale for us to provide a managed AR/FR clothing program is secure through our comprehensive data security practices. While we do not collect or store sensitive personally identifiable information (PII) or credit card information, we take pride in protecting any data shared, including employee names, email addresses, and more.

- Our practices are third-party audited to ensure compliance with Payment Card Industry Data Security Standards (PCI-DSS). Accordingly, to maintain certification, Tyndale completes the PCI Self-Assessment Questionnaire (SAQ) and submits to quarterly third-party scans of our network for vulnerability.
- Payments for orders placed via our custom online ordering website for managed apparel programs and in our physical retail stores utilize PayTrace, a secure PCI-compliant third-party payment processor. Customer credit card information is encrypted and never stored by or visible to Tyndale.

- Networks are monitored on a 24x7 basis. In the event of suspicious activity, our Intrusion Prevention System blocks the activity and notifies Tyndale for additional follow-up. Any unusual activity is followed up on immediately.
- Tyndale employees are given security permissions based on specific job functions and manager's direction. Additionally, all Tyndale employees are required to abide by an established Code of Conduct and Confidentiality Policy, and Tyndale takes a zero-tolerance approach in enforcing these policies.
- By utilizing both a self-owned data center as well as a managed co-location facility, we ensure redundancy for disaster recovery purposes.

Factory Store Locations and Services

To better serve wearers, four Factory Stores and Service Centers in locations across the USA – Williamsport, PA; Midland, TX; Oklahoma City, OK; and Concord, CA – have inventory on the shelves. These Factory Stores allow your employees to see, feel, and try on an unmatched selection of high-quality AR/FR before you buy – typically available to take home the same day. Tyndale stores:

- Are a one-stop shop for keeping your workers safe, comfortable, and compliant with applicable safety regulations.
- Are home to Tyndale's AR/FR clothing product line for men and women, as well as a variety of FR clothing made by other leading manufacturers.
- Offer a wide selection of sizes, including women's sizes.
- Serve retail customers, corporate accounts, and managed programs – employees can spend their allowance/allotment on Ocala-approved items right in the stores!

Tyndale's Environmental, Health, Safety, and Philanthropic Commitment

By choosing Tyndale, you partner with a company that supports your environmental and sustainability goals. Tyndale is dedicated to conducting business in an environmentally responsible manner, benefiting our employee "members" and companies alike. Through conscientious action, raising awareness, and fostering a climate of accountability, we continually seek new ways to improve our practices and minimize our impact on the environment.

- Tyndale's headquarters uses radiant floor heating, which reduces energy costs by 10-40% compared to forced air heating.
- Tyndale uses recycled paper products. We discontinued the purchase of all disposable cups and encourage employees to keep electronic files instead of printed documents.
- Tyndale's Corporate HQ and Pipersville Warehouse locations are 100% landfill-free facilities. All waste is converted to energy through Sustainable Waste Solutions.
- Tyndale's online return process minimizes our impact on the environment; printing a return form and return shipping label only when needed eliminates more than a quarter-million sheets of wasted paper per year.

- Complimentary healthy snacks for employees at all company locations.
- Company-sponsored employee Fitbit fitness tracker program and community, encouraging employees to stay active with monthly challenges and prizes.

As a leading provider of safety products, Tyndale is passionate about leading by example. Tyndale is committed to providing a safe work environment for all our members.

- Tyndale's Safety Committee has been certified by the Commonwealth of Pennsylvania Department of Labor & Industry's Bureau of Workers Compensation since 2010. - All employees must complete the "New Hire Safety Training" as part of their orientation and participate in additional training and emergency preparedness drills on an annual basis.
- To enforce a culture of safety at Tyndale, the company maintains a close call and safety suggestion reward program.

Established in early 2017 and led by Tyndale CEO, Gail Whittenberger, Tyndale's [Proud to Help Committee](#) was established to give back to the community – in our backyard and across the country. The Committee solicits employee input to select non-profits to actively support throughout the year. Proud to Help gives Tyndale members the opportunity to donate their time and resources to charities that positively impact the lives of others. Over the years, Tyndale has worked with and supported:

Protecting your Ocala's workforce with premium, reliable garments is something we are particularly proud of. We are committed to providing products that meet or exceed your requirements and our own expectations of quality. In fact, quality assurance is woven into every step of our manufacturing and distribution process. Our practices – generally outlined below – directly translate to safe and satisfied employees:

- Fabric suppliers are vetted by our Technical committee before a single yard is brought into our facilities for production.

HOW TO MEASURE

All numbers listed above are measurements of the garment unless labeled with 'Body'.

NECK | Select a collared shirt that fits you well. Lay the collar flat and measure from the far end of the button hole to the button. Round up to the nearest inch for your neck measurement.

CHEST | Measure just under arms and across shoulder blades at the widest part of your chest. Be sure the tape measure is parallel to the floor. If waist is greater than chest measurement, use waist measurement.

WAIST | At your natural waistline, measure where your pants would normally ride. For an accurate measurement, do not measure over other clothing.

INSEAM | Without shoes; measure on the inside of your leg, from crotch to below your ankle.

Note: Due to the nature of flame resistant fabrics, pants will shrink approximately 1" in length during the first 25 washings, and will shrink a total of 2" in length during the first 50 washings.

Real Customer Reviews

I received the new style of Tyndale's F293T FR jeans today, and your team totally hit the mark!

-Sarah Thomas, Houston, TX

Great shirt for the ladies. The material is durable just like the ones made for the men's shirt. But this has a feminine look.

[Style K193T]

Favorite pair of Tyndale jeans, they fit well, are comfortable to work in, and are the most flattering.

HOW TO MEASURE

All numbers listed above are measurements of the garment size.

CHEST | Measure just under arms and across shoulder blades at the widest part of your chest. Be sure the tape measure is parallel to the floor. If waist is greater than chest measurement, use waist measurement.

WAIST | At your natural waistline, measure where your pants would normally ride. For an accurate measurement, do not measure over other clothing.

HIPS | Measure the widest point between your natural waist and crotch.

Note: Due to the nature of flame resistant fabrics, pants will shrink approximately 1" in length during the first 25 washings, and will shrink a total of 2" in length during the first 50 washings.

FRC CARE & MAINTENANCE

Arc-rated Flame Resistant Clothing (FRC) is the "last line of defense" in the event of an arc flash or flash fire — there to protect you when all other safety measures and precautions have been unsuccessful in preventing an incident. **Make sure your FRC performs and protects as expected by following these simple steps:**

⬆️ Don't Use Chlorine Bleach

Chlorine bleach can break down the chemical bond between the flame retardant and the base fabric for certain types of FRC fabrics and can negatively impact color retention and fabric strength for all FRC fabrics.

Always follow the laundering instructions on the garment label for best results.

⬆️ Don't Wear FRC That is Soiled With Flammable Contaminants

Flammable contaminants — oil, gas, grease, etc. — can ignite during an arc flash or flash fire and cause injury even though the FRC garment will self-extinguish.

Completely remove flammable substances before the garment is worn again. To help with difficult cleaning, try applying detergent directly to the spot or dry cleaning.

⬆️ Retire FRC if it is Worn Out

To know when a garment is worn out and should be retired from service, look for thin or "thread-bare" areas, unrepaired holes, excessive wear or abrasion, and damage like rips, cuts, tears, broken closures, or torn, open, or frayed seams. If damage is minor, contact Tyndale to request a repair or a complimentary FRC repair kit. Stop wearing the garment until it is properly repaired using FRC materials.

TYNDALE'S FRC CARE & MAINTENANCE TRAINING SOLUTION:

Visit www.TyndaleUSA.com/frccare to view Tyndale's training video, which covers recommended practices for laundering FRC at home and provides guidance for understanding when a garment should be repaired or retired from service.
