NOTES:

Price includes all material and labor to complete the project. Scope of work is renovation of existing epoxy floors and cove base in Building 800. Crew will clean, scarify and prep existing epoxy floors and base to ready to installation. They will then install new slip resistance flake system on all floors and cove in project area. The quote also includes freight, delivery, and full-time project management. Pricing is based on routine removal and floor prep - should moisture or any major issues be discovered, we will stop and discuss how to proceed. Client to remove everything from project space prior to starting - anything remaining will be worked around to the best of ability. Coatings to follow existing contour of room. Project expected to take 1 week to be fully completed and cured.
