

Dear Richard,

Since our last tariff-related communication to you, import tariffs have increased again, adding to the costs we incur on incoming goods.

As part of our ongoing commitment to transparency and keeping you informed, we want to let you know that we anticipate that starting with orders placed on December 1st, updated tariff rates will be charged. This reflects our current inventory, which includes goods for which we have already paid these increased tariffs.

Please know that we have made every effort to minimize the impact of these changes. However, the magnitude of the tariff increases leaves us with no other viable option to maintain the quality and availability of the products and services you depend on to protect your most valuable assets in motion: your people, your equipment, and your reputation.

As there could be changes at any time, we will send another communication one month before the new tariff charges go into effect, to help you prepare.

Should you have any questions, please do not hesitate to contact your account representative or our customer support team.

Thank you for your continued partnership. We appreciate your understanding and support.

Yours in Safety,

Lytix Client Success
