### Applicant Request:

The applicant is requesting replace the existing shingle roof with a Tri County Metal dark gray or charcoal colored metal roof.

## Staff Analysis

### Certificate of Appropriateness Criteria for Decisions (Section 94-82(g)):

The Code states that the Board may issue a certificate of appropriateness for the reconstruction, alteration, new construction, non-permanent structures, demolition, partial demolition, or removal of any building or structure within a locally designated historic district or any designated local landmark, or any other activity for which a CA is required, if such action is not deemed contrary to the purposes of historic preservation and to the special character of districts, sites and resources as designated specifically. The board's decisions will be based on the Secretary of the Interior's Standards, the city's Historic Preservation Design Guidelines, this chapter, and the following criteria:

1. Exterior alterations shall not diminish the architectural quality or historical character of the building or the building site.

*The roof pitch will remain gabled. Therefore, there will be no impact on the architectural quality of the building or building site. However, the historical character will be diminished*

*due to the obvious change in roofing material. The change will be noticeable against the gabled roof pitch. However, the applicant is requesting a dark gray or charcoal color which is consistent with the historic roof color.*

**Secretary of the Interior's Standards (Page 44) - Roofs:**

**Recommended:**

- Identifying, retaining, and preserving roofs, and their functional and decorative features, that are important in defining the overall historic character of the building. The form of the roof (gable, hipped, gambrel, flat, or mansard). Is significant, as are its decorative and functional features (such as cupolas, cresting, parapets, monitors, chimneys, weathervanes, dormers, ridge tiles, and snow guards), roofing material (such as slate, wood, clay tile, metal, roll roofing, or asphalt shingles, as well as its size, color and patterning.

*The form of the roof will remain gabled, and no other decorative and functional features will be altered. However, the roofing material will change from shingles to metal.*

**Not Recommended:**

- Altering the roof and roofing materials which are important in defining the overall historic character of the building so that, as a result, the character is diminished.
- Replacing historic roofing material instead of repair or replacing only the deteriorated material.
- Changing the type or color of roofing.

*The material of the roof will be changed from shingle to metal and the roof in its entirety will be replaced. However, the proposed color will remain consistent with the historic roof color.*

<b>Staff Recommendation: Not Appropriate</b>
