

DRINKING WATER PROBLEM CORRECTED

Customers of Oak Haven Quadruplexes were notified on 9/8/2023 of a problem with our drinking water and were advised to boil the drinking water before consumption as it contained potentially harmful bacteria. We are pleased to report that the problem has been corrected and that it is no longer necessary to boil your water before consumption. We apologize for any inconvenience and thank you for your patience.

Samples from Oak Haven's well were taken and analyzed for bacterial presence. The latest round of five consecutive samples were taken and they all came back negative for E. coli and Total Coliform. The drinking water is free of contamination and no longer needs to be boiled before consumption.

As always, you may contact CSWR – Florida at 1-855-476-1942 or 1630 Des Peres Rd, Suite 140, Des Peres, MO 63131 with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
